## PRODUCT DESCRIPTION:

With BCAA Max, you get a full 1000mg of the purest “uncoupled” (free form) branched amino acids available. These three “essential” aminos (leucine, valine, isoleucine) are formulated in the precise and proven 2:1:1 ratio. As informed strength and endurance athletes know, BCAAs are important as they are directly metabolized in the muscle rather than the liver. In other words, after digestion, BCAAs are readily available for the muscles to use as needed. BCAAs also play a crucial role in maintaining anabolism and decreasing muscle catabolism by promoting protein synthesis, enhancing nitrogen retention, preventing muscle breakdown, providing fuel for muscular energy, increasing the anabolic hormone response to exercise, as well as alleviating fatigue. Vitamin B6 has been added to enhance overall BCAA utilization and absorption.
